

Day 78 - Azure Key Vault

Objective

To understand and implement Azure Key Vault for securely storing secrets and keys, and to use them in an application.

Steps Performed

Created Azure Key Vault (kittyVault) in Azure Portal.

Configured access policies and permissions.

Created a Secret inside Key Vault.

Created a Key inside Key Vault.

Accessed Key Vault using .NET Console Application.

Used DefaultAzureCredential for authentication.

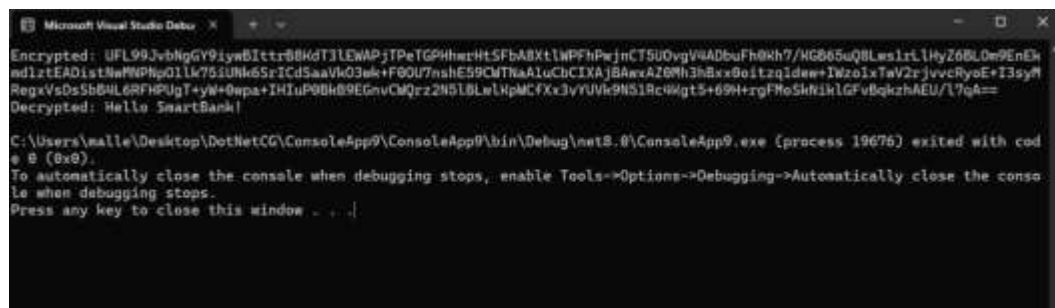

Implemented encryption and decryption using Azure Key Vault keys.

Verified output in console.

Implementation (Code Summary)

Used Azure.Security.KeyVault.Keys.Cryptography with DefaultAzureCredential to perform encryption and decryption.
